

Using visuals with children

This 2 hour virtual in setting training will provide all practitioners in an Early Years setting with information about different visual systems (objects of reference, photographs and symbols) that can be implemented in your setting for groups of children and individuals. It will help you to make informed choices about what visuals to use with children and explain how children can benefit from using them.

Learning objectives:

- list the benefits of using visual support with children in an Early years setting.
- make informed choices about the most appropriate visual support strategies and tools to implement with children.
- understand how children develop their understanding of visuals and how they learn to use them.
- understand the importance of working in partnership with parents and other professionals in implementing visuals for individual children.
